**Subject: Expression of interest for the engagement of forestry contractors**

Dear Mr. Romanov,  
following the recommendation of Mr. Dragan Vlahović, I address you with the request to provide us with contact with companies from Ukraine interested in wood cutting in Croatia, in the Banovina area.

We have the need for contractors who would have a cutting capacity of 5,000 m<sup>3</sup> / month or 60,000 m<sup>3</sup> / year. Work is ongoing throughout the year. The forests in question are deciduous with predominant parts of beech, oak, ash and elm. The average yield is 170 m<sup>3</sup> / ha.

We are ready to assist the contracted companies in obtaining all the necessary documentation in Croatia and also finding suitable accommodation and food for workers.

The companies we would hire for the job should have appropriate harvesting and logging machines: harvesters, forwarders, forest tractors, chainsaws etc. We do not dictate the number and type of machines.

Zagreb, October 23<sup>rd</sup>, 2018
