At QaylTech, we believe in the transformative power of innovation to transcend barriers and unlock boundless potential. Our journey began with a simple yet profound realization: that every individual, regardless of ability, deserves to live a life of dignity, independence, and opportunity.

We are a country that also experienced the horrors of war, after the end of which we had 11 thousand disabled war veterans. Thanks to the work we have done, we were able to provide our devices within the framework of the state order, which can become a successful example for Ukraine as well.

With this ethos as our guiding light, we have dedicated ourselves to developing innovative solutions that empower individuals with disabilities to navigate life's challenges with confidence and grace. From cutting-edge mobility aids to revolutionary assistive technologies, our products are meticulously crafted to enhance quality of life, promote independence, and foster a sense of belonging within diverse communities.

At the heart of QaylTech lies a deep-seated commitment to building bridges, forging partnerships, and fostering a culture of empathy, understanding, and inclusivity. We firmly believe that true progress is not measured solely in profits and market share, but in the positive impact we create in the lives of those we serve.

As we set our sights on Ukraine—a nation with a rich history, vibrant culture, and resilient spirit—we are filled with optimism and excitement for the possibilities that lie ahead. We see in Ukraine a partner who shares our values of perseverance, compassion, and progress—a partner with whom we can collaborate to effect positive change and create a future where every individual, regardless of ability, is celebrated for their unique strengths and contributions.

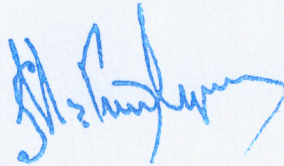

In closing, I extend my deepest gratitude for considering this heartfelt proposal. On behalf of QaylTech, I express our sincere eagerness to engage with the Chamber of Commerce and Industry of Ukraine and explore avenues for partnership, collaboration, and mutual growth.
