P4-Crossover

4POWER4
Always on track

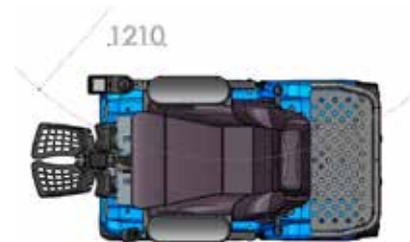

No path scares it !

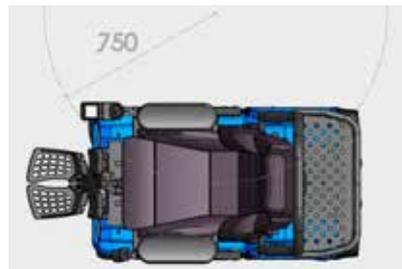

Mixed indoor/outdoor use.

Our **P4-Crossover** and **P4-Adventure** wheelchairs share 4 motors and 4-wheel drive (one motor per wheel).

- The **P4-Crossover**, with its fixed rear wheels and power-assisted steering front wheels, offers a turning radius of 1.21m.

- The **P4-Adventure** also features 4-wheel drive with all-wheel steering controlled by a servo motor, providing one of the best possible turning radius of 0.75m.

Few options

With the **P4**, there are no hidden costs (the basics are included).

They can be customized according to your needs.

Top Case (*)

Practical and clever:

A handle brings it close to you.

It folds away effortlessly with one hand.

Capacity: 39 liters, 3kg load.

Useful in all circumstances

Designed to go through doors, they allow you to move indoors, but more importantly, outdoors in your garden, in the countryside, mountains, seaside, and city.

They will take you easily where other wheelchairs can struggle:

gravel, wet sand (not dry sand), mud, snow, stones, grass, cobblestones... are their playground.

In the countryside

Originally designed for rural environments, with a rust-protected chassis and screws, the **P4** models adapt to many situations such as mud, snow, water (up to 10cm without submerging the motors), stones, etc.

Powerful motorization

4 motors of 350 watts each combined with low-pressure tires provide optimal grip.

For easier transfers

The **P4-Adventure**'s seat moves forward 16 cm to ease transfers.

For slopes and descents

The **P4-Adventure** features a seat tilt to keep a horizontal position on steep slopes.

In your garden

Ideal for grass, gravel, stones, and all inaccessible paths to other wheelchairs.

In the city

The P4 definitively solves daily obstacle-crossing issues.

City travel is often difficult due to poor accessibility, particularly curbs. Despite recent improvements, many obstacles still block traditional wheelchairs. Running an errand can quickly become exhausting!

Their ability to climb obstacles higher than 12 cm lets you face anything with confidence!

Obstacle-climbing ability combined with an excellent turning radius make the **P4** surprisingly agile and practical in cities, where they gain a new vocation.

Climbing or descending a step is no longer an issue, and moving across uneven ground like cobblestones becomes easy.

Foldable roll bar (*)

Tilts forward or backward for easier vehicle access.

Road lighting + orange beacon (*)
 Mounted on top of the roll bar, makes the wheelchair visible from far away in the dark.

Top case (*)
 Folds away with one arm to keep everything within reach.

Main power switch
 Facilitates winter storage and maintenance.

Suspensions
 Absorb vibrations and uneven ground. Improve driving comfort and protect the back.

Cars fasteners
 For car transport.

Headrest
 Integrated comfort h

 En

Luggage rack.

Low-pressure tires
 Ensure optimal grip.

(*) Option

Roll bar (*) and foldable backrest
 For easier access into a vehicle.

Tilt-in-space (*)
 Shifts center of gravity to secure steep descents.

R-Net electronics: 5 driving profiles.

Allows attendant control functions, environmental control... Compatible with iOS - Android + Bluetooth connection.

headrest.

Seat with lateral support

Ensures trunk stability on rough paths.

Semi-gutter armrests

Better arm stability on rocky paths. Adjustable on 3 axes, foldable backward.

Controller mounted on swing away

With integrated cup holder.

Transfer bars

Make getting in and out easier.

Elevating leg rests

Manual or electrical (*)

Footplate

Tiltable from 90° to 180°.

Independently adjustable right/left. Foldable backward.

Curb descent wheels

Neutral

Forward seat adjustment (*)
Eases transfers, adjusts center of gravity.
